

**Invitation to participate:  
People who have experienced stroke**

**Project Title:**

**A Network of sites and 'up-skilled' therapists to deliver best-practice stroke rehabilitation of the upper limb**

We are recruiting people with stroke who would like to participate in a therapy program that focuses on touch sensation and use of the hand.

SENSe Therapy Centres have been established through a partnership between Latrobe University and The Florey Institute of Neuroscience and Mental Health, with the support of the National Health & Medical Research Council.

**SENSe Therapy: SENSE Training Modules**

Texture Discrimination

Tactile Object Recognition

Proprioception Discrimination

Occupation based Strategy learning

Potential participants should be adults (over 18 years of age) who have had stroke and have altered feeling in their hand. Participants in the study will be asked to attend therapy 14 times over a period of six months.
