Teaching Educators about Acquired Brain Injury (Teach-ABI):
A Healthier Classroom For All

Recruiting educators to evaluate:

Teach-ABI Australia

An online e-module to Educate Teachers on
Acquired Brain Injury (ABI) in the Classroom

Teach-ABI is an eLearning module for educators about paediatric acquired brain injury. *Teach-ABI* was created to raise educators' awareness and knowledge of ABI and promote positive outcomes for children with ABI in the education system.

We are looking for registered primary school educators to complete an online training module and share their thoughts on the resource during an interview (approx. ~ 2 hours commitment time).

This study involves a few short questionnaires, completing the online module and an interview, which can be completed entirely online through Zoom.
